

## Acquisitions back on Emami's agenda

Encouraged by a cash pile of ₹300 crore, fast-moving consumer goods company Emami had again put acquisitions on top of its agenda at its last board meeting, a source said. The Kolkata-based maker of Boroplus antiseptic was chasing domestic brands, in line with its plan to enter the household segment and

increase reach in health care, the source added. "Some plans did not work out, given the current economic scenario, but the promoters are stressing on the need for inorganic growth to give a boost to its top line. The plan is to acquire a brand out of few selected names, as a brand will have its market ready," the person said.
